

Argos Cantilever sliding gate

The Heras Argos gate combines optimum flexibility and security. Argos is the perfect translation of a swing gate into a sliding gate for welded mesh and chainlink fencing. Strong and clever.

High-quality aluminium forms the basis of this smoothly running and maintenance-free gate. The narrow mesh of the welded mesh panel makes the gate almost impossible to climb.

Argos is delivered completely assembled. The welded mesh panel has a protective coating as standard. The free opening varies from 5,000 – 7,000 mm on a single-leaf gate.

- Fully maintenance free
- Quick assembly
- Integrated toothrack holder
- Dutch Quality Design

Cantilever sliding gate

Argos

Smoothly running

Safe, rounded corners

Various options

Strong and clever

All versions feature electrical operation. The Argos gate is mainly suitable for integration with welded mesh and chainlink fencing.

Technical specifications

- Cantilever sliding gate
 - Fully assembled
 - Smoothly running
 - Coated welded mesh panel as standard
 - Mesh width 50 x 200 mm
 - Fully maintenance free *
 - Welded mesh panel attached by means of brackets
 - Integrated toothrack holder
 - Safe, rounded corners
 - Gate height 1,400 – 2,000 mm
 - Free opening 5,000 – 7,000 mm
 - Electrical operation
 - UL 325 and NEN-EN 13241-1 compliant
- * only applies to the gate, not to its operation

Various options

- Serrated strips
- Flashlight
- Infrared
- Floodlight
- Extra remote control

Ask for all possibilities

Colours – Striping

- Option 1: RAL 9006 coated welded mesh panel with blank aluminium frame with RAL 5016 striping
- Option 2: Fully RAL 6005 coated gate with RAL 9010 striping
- Other colours upon request
